EXECUTIVE SUMMARY

Technology leader with deep expertise in building and scaling high-performance SaaS platforms. Extensive experience in fintech, payments, and restaurant technology, delivering secure, scalable solutions that drive business growth. Skilled in cloud architecture, system security, and real-time data processing, with a proven ability to lead teams, optimize costs, and execute complex technology initiatives.

Key strengths:

- Designing secure, scalable cloud-native platforms.
- Driving strategic growth by aligning technology with business objectives.
- Turning client insights into actionable product roadmaps that increase revenue.
- Developing high-impact partnerships and vendor relationships.
- Supporting enterprise sales with technical leadership and strategic collaboration.

EXPERIENCE

Curbngo | Chief Technology Officer

2021 – Present

Currently leading Curbngo's transformation from a food ordering app into a sophisticated restaurant operating platform, integrating POS systems, kitchen displays, self-ordering kiosks, and third-party sales channels. The platform now processes over one million monthly orders, handles 20 million+ daily transactions, and maintains 99.9999% uptime with less than 60 minutes of unplanned downtime in 2024.

Key achievements:

- **Drove a 75% YoY revenue increase** by developing high-volume restaurant solutions and launching an enterprise division, expanding into self-checkout and made-to-order food for convenience stores.
- **Expanded market reach and accelerated adoption** through strategic partnerships with Deliverect, NCR, Stripe, and GlobalPay, enabling seamless integrations with major food delivery and retail platforms.
- **Optimized organizational structure and streamlined operations**, reducing costs by 35% while improving development velocity and system resilience.
- **Secured \$3.5 million in funding**, playing a central role in investor engagement and strategic growth planning.
- **Led enterprise client engagements**, including a subsidiary of Loblaw Companies Limited (2,400+ stores) and a major Quebec-based gas station chain (500+ locations).
- **Designed and implemented a unified front-end architecture**, enabling consistent deployment of both native Android and responsive web apps from a single UI codebase, a unique innovation in restaurant technology.

Broadridge LTX | Chief Technology Officer

2016 – 2019

- **Architected and launched LTX Bond Marketplace**, a fully cloud-native trading platform optimizing \$60B in corporate bond liquidity, enabling real-time trading insights.
- **Designed high-frequency trading infrastructure**, ensuring real-time liquidity discovery and faster trade execution in an otherwise illiquid market.

GFI Group / BGC Partners | Chief Technology Officer

2001 – 2016

- **Drove electronic trading expansion**, increasing adoption and growing CreditMatch revenues to \$320M annually.
- **Expanded global electronic trading operations**, serving 20,000 traders worldwide.
- **Established a global customer satisfaction program**, cutting technical issues by 50% and enhancing trading platform stability.

AWARDS & PATENTS

- Recognized **four times by Institutional Investor** in the Trading Technology 40 for innovation in financial technology.
- **U.S. Patent #7,912,949** – Method for tracking and synchronizing data changes across distributed systems.

TECHNOLOGY STACK

- **Cloud & Infrastructure:** AWS (RDS, S3, EC2, ALB, CloudFront)
- **Payments & Fintech:** Stripe, GlobalPay
- **Development:** Android, Java, JavaScript, Angular, Python, PHP / Laravel, Redis
- **Cybersecurity & Risk Management:** Secure fintech architectures, regulatory compliance, real-time fraud detection
- **Leadership & Strategy:** Scaling SaaS platforms, enterprise partnerships, technical sales support
